`http://arxiv.org/abs/math.DG/0110035`

We are very grateful to Daniel Maerten for pointing out the following:

1. In Eqs. (2.8a) and (2.8b), the function $r \circ \Phi^{-1}$ should be used instead of $r \circ \Phi$. Note that at several places of the text we implicitly identify r with $r \circ \Phi^{-1}$, S_r with $\Phi(\{r = R\})$, b with b_0, *etc.*

2. In (2.17), a V should be replaced by V_1.

3. Eq. (6.3) should read (there was a ln missing)

$$\ln \varphi_2 \geq C_2 > -\infty \; . \tag{6.3}$$

   Similarly we should have

$$\ln \varphi_1 \geq C_1 > -\infty \; . \tag{6.4}$$
