

Curriculum vitae of Immanuel M. Bomze

Short biosketch

Immanuel M. Bomze was born in Vienna, Austria, in 1958. He received the degree *Magister rerum naturalium* in Mathematics at the University of Vienna in 1981. After a postgraduate scholarship at the Institute for Advanced Studies, Vienna from 1981 to 1982, he received the degree *Doctor rerum naturalium* (Ph.D.) in Mathematics at the University of Vienna. After his *Habilitation* 1987, he held several visiting research positions at various research institutions across Europe, the Americas, Asia and Australia. He also gained some practical Operations Research experience during his work as a research mathematician in the *Business & Marketing Research/Operations Research* group of the national incumbent telecommunication operator *Telekom Austria* 2002-2004. Since 2004, he holds a chair (full professor) of *Applied Mathematics and Statistics* at the University of Vienna.

Bomze's research interests are in the areas of nonlinear optimization, qualitative theory of dynamical systems, game theory, mathematical modelling and statistics, where he has edited one and published four books, as well as over 100 peer-reviewed articles in scientific journals and monographs. The list of his co-authors comprises over seventy scientists from more than a dozen countries in four continents. In 2014 he was elected *Fellow of EurOpt*, the Continuous Optimization Working Group of *EURO*, the Association of European Operational Research Societies <https://www.euro-online.org/websites/continuous-optimization/>.

As a member of program and/or organizing committees, he co-organized various scientific events and he is an Associate Editor for five international journals. For several science foundations and councils (based in Canada, the Czech Republic, Germany, Great Britain, Hong Kong, Israel, Italy, the Netherlands, Norway, Portugal, Singapore, Spain, USA), and for almost 50 scientific journals he acted as a reporting referee. 2011–2017 he served as an Editor (Co-EiC) of the *European Journal of Operational Research*, one of the worldwide leading journals in the field. Moreover, he serves as the Austrian Representative in the Management Committee of the European *COST Action CA16228 European Network for Game Theory*. Bomze co-founded the *Vienna Center of Operations Research (VCOR)* and serves as its co-director. As elected president of *EURO*, he commenced office in 2019 and will serve in this function until end of 2020, and in the *EURO* Executive Committee until end of 2021 (then as Past President).

Major scientific achievements

In his Ph.D. thesis, Immanuel Bomze completely classified all (more than 100 topologically different) possible flows of the *Generalized Lotka-Volterra dynamics* on the plane.

In the mid 1980's, Bomze helped to popularize the field of *Evolutionary Game Theory (EGT)*, among researchers in Economics and Social Sciences. While EGT received most attention within Theoretical Biology around 1980, its significance is now acknowledged in many more areas. Recently, EGT has been applied, e.g. to model evolution of social networks.

Around the turn of the millennium, Bomze coined, together with his co-authors, the now widely used terms *Standard Quadratic Optimization* and *Copositive Optimization* or *Copositive Programming*. While the former deals with the simplest problem class in non-linear optimization with an NP-hard complexity, Copositive Optimization allows a conic reformulation of these hard problems as a linear optimization problem over a closed convex cone of symmetric matrices, a so-called *Conic Optimization Problem*. In this type of problems, the full extent of complexity is put into the cone constraint, while structural constraints and also the objective function are linear and therefore easy to handle. Since this construction facilitates computation of tractable yet tight and rigorous bounds for multimodal optimization problems, it represents a powerful exact method for global optimization. Among the manifold applications of this approach are all (fractional) polynomial mixed-integer, and therefore also most combinatorial optimization problems, which in turn can be used in Analytics, Economics, Engineering, Data Science and Machine Learning, to name but a few.

Chronological table

Education

1976–1982	studied Mathematics and Physics at University of Vienna
1981	Graduation (Mag. rer. nat.)
1981–1982	Ph.D. study (Mathematics) at University of Vienna
1981–1983	Postgraduate student at the Institute of Advanced Studies, Vienna
1982	Graduation (Dr. rer. nat.)
1987	Habilitation at the University of Vienna

Professional career and academic functions (selection)

- 1982–2002 Assistant/associate professor at Univ.Vienna
- 2002–2004 Research mathematician, Business & Market Research/OR Dept., Telekom Austria AG, Vienna
- 2003–2006 President of the Austrian Operations Research Society (OeGOR)
- 2004–now Full professor (Chair of Applied Mathematics and Statistics), Univ. Vienna
- 2005–2006 Head of department
- 2006–2007 Vice dean of the Faculty of Business, Economics, and Statistics
- 2009–2018 Study director (Vize DSPL) of the “Abraham Wald” Ph.D. Program in Statistics and Operations Research
- 2017–now Co-director, Vienna Center of Operations Research (VCOR)
- 2018–now Study director (Vize SPL) for the Statistics Programs (Bachelor, Master)
- 2019–2020 President of *EURO*

Academic visits (selection)

- 1993, 1998 Visiting researcher, IIASA, Laxenburg
- 1994 Visiting fellow, Department of Economics, University of Melbourne
- 1995 Visiting researcher, Wilfrid Laurier University, Waterloo, Ontario
- 2004, 2008 Visiting professor, Università “La Sapienza”, Roma
- 2001, 2004 Visiting professor, Università “Ca’ Foscari”, Venezia
- 2006/07, 2014 Visiting professor, Università della Calabria, Rende, Cosenza
- 2007 Visiting researcher, Universität (now TU) Dortmund
- 2007 Lecturer, CIME Summer School, Cetraro
- 2008, 2016/17 Visiting researcher, Universidad de Sevilla
- 2008 Visiting researcher, Program for Evolutionary Dynamics, Harvard University
- 2009 Visiting researcher, Universidade de Coimbra
- 2010, 2015 Visiting professor, Universidade Nova de Lisboa
- 2012 Visiting researcher, GERAD Montréal
- 2012, 2013 Visiting professor, Courant Institute, New York University
- 2012 Visiting researcher, Technion Haifa
- 2013 Visiting fellow, Cambridge University UK
- 2013, 2016 Visiting professor, Koç Üniversitesi Istanbul
- 2016 Visiting professor, Universidade de São Paulo
- 2016 Visiting fellow, IMPA Rio de Janeiro
- 2016 Visiting researcher, University of NSW Sydney
- 2016 Visiting professor, Singapore University of Technology and Design

Publications

Books

- [1] *Nonlinear Optimization* (I.B., V. Demyanov, R. Fletcher, T. Terlaky, I. Pólik; editors: G. Di Pillo, F. Schoen). Lecture Notes in Mathematics 1989. Springer, New York (2010).
- [2] *Developments in Global Optimization* (I.B., T. Csendes, R. Horst, P. Pardalos, editors). Kluwer, Dordrecht (1997).
- [3] *A functional analytic approach to statistical experiments*. Pitman Research Notes in Mathematics **237**. Longman, London (1990).
- [4] *Game theoretic foundations of evolutionary stability* (I.B., B.M. Pötscher). Springer, Berlin (1989).

Publications in peer reviewed outlets (periodicals and edited books)

- [5] Constructing patterns of (many) ESSs under support size control (I.B., W. Schachinger). To appear in: *Dynamic Games and Applications*, doi.org/10.1007/s13235-019-00323-1 (2019).
- [6] First-order methods for the impatient: support identification in finite time with convergent Frank-Wolfe variants (I.B., F. Rinaldi, S. Rota Bulò). *SIAM Journal on Optimization* **29**, 2211-2226 (2019).
- [7] A Hessian barrier algorithm for linearly constrained optimization problems (I.B., P. Mertikopoulos, W. Schachinger, M. Staudigl). *SIAM Journal on Optimization* **29**, 2100-2127 (2019).
- [8] Nonconvex min-max fractional quadratic problems under quadratic constraints: copositive relaxations (P.A. Amaral, I.B.). *Journal of Global Optimization* **75**, 227–245 (2019).
- [9] Pure infection-immunization dynamics for partnership games: a correction (I.B., F. Rinaldi, S. Rota Bulò). *Games and Economic Behaviour* **114**, 315–317 (2019).
- [10] Notoriously hard (mixed-)binary QPs: empirical evidence on new completely positive approaches (I.B., J. Cheng, P.J.C. Dickinson, A. Lisser, J. Liu). *Computational Management Science*, doi.org/10.1007/s10287-018-0337-6 (2018).
- [11] On minimal Hölder gaps and Shannon entropy balance. *Portugaliae Mathematica* **75**, 1–10 (2018).
- [12] Extended trust region problems over one or two balls: exact (semi-)Lagrangian relaxations (I.B., V. Jeyakumar, G. Li). *Journal of Global Optimization* **71**, 551–569 (2018).

- [13] Building a completely positive factorization. *Central European Journal of Operations Research* **26**, 287–305 (2018).
- [14] The complexity of simple models – a study of worst and typical hard cases for the Standard Quadratic Optimization Problem (I.B., W. Schachinger, R. Ullrich). *Mathematics of Operations Research* **43**, 651–674 (2018).
- [15] Robust spherical separation (A. Astorino, I.B., A. Fuduli, M. Gaudioso). *Optimization* **66**, 925–938 (2017).
- [16] A fresh CP look at mixed-binary QPs: new formulations and relaxations (I.B., J. Chen, P.J.C. Dickinson, A. Lisser). *Mathematical Programming* **166**, 159–184 (2017).
- [17] Copositivity for second-order optimality conditions in general smooth optimization problems. *Optimization* **65**, 779–795 (2016).
- [18] Copositive relaxation beats Lagrangian dual bounds in quadratically and linearly constrained QPs. *SIAM Journal on Optimization* **25**, 1249–1275 (2015).
- [19] The structure of completely positive matrices according to their CP-rank and CP-plus-rank (I.B., P.J.C. Dickinson, G. Still). *Linear Algebra and its Applications* **482**, 191–206 (2015).
- [20] Copositivity-based approximations for mixed-integer fractional quadratic optimization (P.A. Amaral, I.B.). *Pacific Journal of Optimization* **11**, 225–238 (2015).
- [21] Narrowing the difficulty gap for the Celis-Dennis-Tapia problem (I.B., M. Overton). *Mathematical Programming* **151**, 459–476 (2015).
- [22] New lower bounds and asymptotics for the cp-rank (I.B., W. Schachinger, R. Ullrich). *SIAM Journal on Matrix Analysis and Applications* **36**, 20–37 (2015).
- [23] New results on the cp rank and related properties of co(mpletely)positive matrices (N. Shaked-Monderer, A. Berman, I.B., F. Jarre, W. Schachinger). *Linear and Multilinear Algebra* **63**, 384–396 (2015).
- [24] From seven to eleven: completely positive matrices with high cp-rank (I.B., W. Schachinger, R. Ullrich). *Linear Algebra and its Applications* **459**, 208–221 (2014).
- [25] Rounding on the standard simplex: regular grids for global optimization (Best Paper Award; I.B., S. Gollowitzer, E.A. Yildırım). *Journal of Global Optimization* **59**, 243–258 (2014).
- [26] Copositivity and constrained fractional quadratic problems (P. Amaral, I.B., J. Júdice). *Mathematical Programming* **146**, 325–350 (2014).
- [27] Constraint Selection in a Build-Up Interior-Point Cutting-Plane Method for Solving Relaxations of the Stable-Set Problem (A. Engau, M.F. Anjos, I.B.). *Mathematical Methods of Operations Research* **78**, 35–59 (2013).
- [28] On the cp-rank and minimal cp factorizations of a completely positive matrix (N. Shaked-Monderer, I.B., F. Jarre, W. Schachinger). *SIAM Journal on Matrix Analysis and Applications* **34**, 355–368 (2013).

- [29] Copositivity detection by difference-of-convex decomposition and ω -subdivision (I.B., G. Eichfelder). *Mathematical Programming* **138**, 365–400 (2013).
- [30] Two spherical separation procedures via non-smooth convex optimization (A. Astorino, I.B., M.P. Brito, M. Gaudio). In: V. de Simone, D. di Serafino, and G. Toraldo (eds.), *Recent advances in nonlinear optimization and equilibrium problems: a tribute to Marco D'Apuzzo*, Quaderni di Matematica, Dipartimento di Matematica, Seconda Universit degli Studi di Napoli, Vol. 27, Aracne, ISBN 978-88-548-5687-5 (2012).
- [31] Standard bi-quadratic optimization problems and unconstrained polynomial reformulations (I.B., Ch. Ling, L. Qi, X. Zhang). *Journal of Global Optimization* **52**, 663–687 (2012).

- [107] Dynamical aspects of evolutionary stability. *Monatshefte für Mathematik* **110**, 189–206 (1990).
- [108] Copositivity and optimization. In: P. Kleinschmidt, F.J. Radermacher (Eds.), *Proc. 12th SOR (Methods in OR 58)*, pp. 27–36, Athenäum, Frankfurt/Main (1988).
- [109] A note on aspirations in non-transferable utility games. *International Journal of Game Theory* **17**, 193–200 (1988).
- [110] Remarks on the recursive structure of copositivity. *Journal of Information & Optimization Sciences* **8**, 243–260 (1987).
- [111] Non-cooperative two-person games in biology: a classification. *International Journal of Game Theory* **15**, 31–57 (1986).
- [112] Measurable supports, reducible spaces and the structure of the optimal σ -field in unbiased estimation. *Monatshefte für Mathematik* **101**, 27–38 (1986).
- [113] Lotka-Volterra equation and replicator dynamics: a two-dimensional classification. *Biological Cybernetics* **48**, 201–211 (1983).
- [114] The role of Mendelian genetics in strategic models on animal behaviour (I.B., P. Schuster und K. Sigmund). *Journal of theoretical Biology* **101**, 19–38 (1983).

Other professional activities (selection)

Editor (Co-Editor-in-Chief) of *European Journal of Operational Research* (2011-2017)

Editor (Member of Editorial Board) of

Central European Journal of Operations Research,
European Journal of Operational Research,
Journal of Global Optimization,
Optimization Letters,
Operations Research Perspectives

Member of the Management Committee of the COST Action CA16228 *European Network for Game Theory* http://www.cost.eu/COST_Actions/ca/CA16228.

Co-founder and co-director of the *Vienna Center of Operations Research (VCOR)* <http://vcor.univie.ac.at/home/>.

President of *EURO* <https://www.euro-online.org/web/pages/1/home> (2019-2020); member of *EURO* Executive Committee 2018-2021.

Reporting Referee for the agencies

Consiglio Nazionale delle Ricerche (CNR), Italy,
National Environment Research Council (NERC), U.K.,
National Science Foundation (NSF), U.S.A.,
Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO), The Netherlands,
German-Israeli Foundation for Scientific Research and Development (GIF),
Research Grants Council of Hong Kong, China,
Canadian Institutes of Health Research (CIHR), Canada,
Natural Sciences & Engineering Research Council (NSERC), Canada,
Social Sciences & Humanities Research Council (SSHRC), Canada,
National Fund for Scientific and Technological Development (FONDECYT), Chile

and for the journals

Advances in Complex Systems,
