

# NATHANAËL BERESTYCKI

## Academic Positions

Professor of Stochastics, Universität Wien	since 2018
Professor of Probability, University of Cambridge	2015, on leave from 2018
Reader in Probability, University of Cambridge	2012-2015
Lecturer, University of Cambridge	2007-2012
Fellow of King's college, Cambridge	since 2009
Postdoctoral fellow, University of British Columbia & PIMS	2005-2007

## Research Interests

Probability theory, geometry and analysis. More precisely: Brownian motion, random geometry, Liouville quantum gravity, Gaussian free field, SLE, dimer model, imaginary geometry, branching and coalescing systems and relation to partial differential equations, random walks on groups, mixing times.

## Education

Joint PhD (Cornell 2005 and ENS Paris 2006). Advisors: R. Durrett and J.F. Le Gall.  
[Jury: J. Bertoin, R. Durrett, M. Ledoux, J.F. Le Gall, Y. Le Jan, and W. Werner.]

## Invited Lecture Courses

Lectures in Probability and Statistics XII, Kolkata, India. Title of lectures: <i>Introduction to the GFF and Liouville quantum gravity</i>	December 2017
Les Diablerets, Switzerland Title of lectures: <i>Universality for the dimer model</i>	February 2017
Chicago summer school in probability. Title of lectures: <i>Introduction to the GFF and Liouville quantum gravity</i>	July 2016
Darmstadt spring school in probability. Title of lectures: <i>Introduction to the GFF and Liouville quantum gravity</i>	April 2016
Marseille. Title of lectures: <i>Random walks on random graphs</i>	October 2015
Clay Institute, Oxford / LMS school “modern developments in probability”, Title of lectures: <i>Introduction to the GFF and Liouville quantum gravity</i>	July 2015
Probability and Representation Theory, Edinburgh Title of lectures: <i>Mixing times and representation theory</i>	February 2014
Ecole Polytechnique (Paris) Title of lectures: <i>Mixing times.</i>	October 2011
Young European Probabilists, Eindhoven, Title of lectures: <i>Recent progress in coalescent theory.</i>	March 2009
IMPA, Rio de Janeiro, Title of lectures: <i>Recent progress in coalescent theory.</i>	January 2009

## Selected Invited Lectures

SPA, Moscow, invited session Lattice models and scaling limits.	July 2017
Oberwolfach <i>Stochastic Analysis: Geometry of Random Processes</i>	May 2017
SLE, GFF and LQG in NYC. Columbia University, New York	March 2017
Oberwolfach, Heat Kernels, Stochastic Processes and Functional Inequalities.	Dec. 2016
British Mathematical Colloquium, <i>morning speaker</i>	April 2016
Clay Institute: Advances in Probability	Sept. 2014
Front Propagation and Particle Systems, Banff	August 2014
Spin Glasses and Related Topics, Banff	July 2014
School and Workshop on Random Interacting Systems, Bath,	June 2014
Mathematical biology, particle systems and reaction-diffusion, Toulouse	March 2014
Random Walks on Groups, IHP, Paris,	January 2014
German Probability and Statistics Days, Mainz	March 2012
Plenary speaker, Stochastic Processes and Applications, Oaxaca (Mexico)	June 2011
Branching processes and coalescent processes, Beijing,	April 2011
Random Structure and Dynamics, Oxford	April 2011
Northeast Probability Seminar, New York,	November 2010
Discrete probability and geometry: the mathematics of Oded Schramm, Jerusalem,	Dec. 2009

## Selected Invited Seminars

KTH Stockholm probability seminar (09/16), Montréal Colloquium (04/16), Helsinki colloquium (10/15), Rainwater seminar Seattle (09/15), UBC (09/15), Duke (11/14), Warwick colloquium (11/14), Oxford (10/13), Bristol (10/13), Warwick (05/13) London Analysis seminar (03/13), Geneva (11/12), Warwick (05/12), U. Washington (04/12), Paris VI (12/11), ENS (12/11), Paris V (11/11), Marseille (11/11), Orsay (10/11), Polytechnique (10/11), ENS Paris (09/11), Frankfurt (05/11), ENS Lyon (04/11), ETH Zürich (10/10), Warwick (06/10), Paris VI (03/10), Bath (03/10), UBC (09/09), Warwick (02/09), UCL (colloquium) (01/09), ETH Zürich (11/08), Bristol (10/08), Microsoft Research (08/08), Weizmann Institute (06/08), Oxford (Stochastic Analysis Seminar) (05/08), Toronto, (04/08), Weizmann Institute of Science (06/07), Technion (05/07), Ecole Polytechnique (02/07), Oxford (Math. Genetics) (02/07), Indiana U. (colloquium) (01/09), U.C. Davis (colloquium) (01/07), Wisconsin (12/06), UCSD (colloquium and seminar) (12/06), UBC (11/06), Chicago (10/06), Cornell (Summer School) (07/06), Wisconsin (10/06), Berkeley (03/06), Oregon State (colloquium and seminar) (02/06), ENS Lyon (01/06), Marseille (01/06), UBC (10/05), Pittsburgh (colloquium) (03/05), Wisconsin (02/05), Microsoft Research (02/05), UCSD (01/05), Paris X (01/05), Marseille Provence (01/05), Delaware (12/04), NYU Courant Institute (02/04).

## PhD students

Richard Pymar (graduated 2011), Lee Zhuo Zhao (graduated 2013), Bati Sengul (graduated 2014), Ed Mottram (graduated 2014), Henry Jackson (graduated 2016), Ellen Powell (graduated 2017), Mo-Dick Wong (current), Antoine Jego (current).

## Postdoctoral Associates

Ariel Yadin (Herschel Smith Fellow, 2009–2010), Arnab Sen (2010–2012), Laure Dumaz (2013–2015), Gourab Ray (2015–2017), Benoit Laslier (2015–2017), Wei Qian (2017–2019), Jonathan Hermon (2017–2019), Marcin Lis (2017–2018)

## Honours, Grants

Early-career fellowship from EPSRC, value £1.2M.	2014
1st recipient of Bernoulli Society Outstanding Expository Paper Prize	2012
Plenary speaker at Stochastic Processes and Application	2011
ESF grant for “Geometry and Analysis of Random Processes”, value €13,950	2013
EPSRC Programme grant, “New frontiers in Random Geometry”. Co-PI with Geoffrey Grimmett and James Norris, value £1.65M.	2011
EPSRC First grant EP/G055068/1 (ranked top), value £290,000	2009
IMS Laha travel award	2004

## Organisation of Conferences

Workshop on Random Geometry, Newton institute Co-organisers: J.-F. Le Gall, S. Sheffield.	July 2018
RaGe (random geometry) in Cambridge, Co-organisers: G. Grimmett, J. Norris.	Cambridge, June 2017.
Interacting particle systems with applications in biology, ecology, and statistical physics. South-easter probability colloquium, special edition in honor of Rick Durrett’s 65th birthday. Co-organisers: J. Mattingly, J. Nolen, L. Popovic.	Duke (NC), May 2017
American Institute of Mathematics (AIM), workshop on <i>Mixing times of Markov chains</i> , Co-organisers: E. Lubetzky, R. Oliveira, and Y. Peres.	San Jose (CA), June 2016.
Workshop on the dimer model. Co-organisers: B. Laslier and G. Ray.	Cambridge, May 2016
Principal organiser, semester at the Newton Institute on <i>Random Geometry</i> . Co-organisers: I. Benjamini, J.-F. Le Gall, S. Sheffield.	INI (Cambridge), Spring 2015
Geometry and Analysis of Random Processes (Easter UK Probability meeting) Co-organisers: G. Grimmett and J. Norris.	Cambridge. April 2013
Extremes in branching Brownian motion and random walks, with L. Addario-Berry and N. Gantert	Oberwolfach, September 2013
The geometry of discrete random structures, with C. Goldschmidt (funded by EPSRC)	Warwick, June 2012

## Other Services

Member of the Editorial boards of:  
*Annals of Probability*, since 2018.  
*Annals of Applied Probability*, since 2016.  
*Electronic Journal of Probability*, since 2015.  
*Springer Briefs in Mathematical Physics*, since 2014.  
*Mathematical Proceedings of the Cambridge Philosophical Society*, since 2014.  
*Theoretical Population Biology*. (Resigned 2012).

I have served as a PhD examiner and been a jury member for “habilitations” in Cambridge, Oxford, Bath, ENS Lyon, Paris Dauphine, ETH Zurich, Paris Diderot.

Grant proposal reviews for: NSA (United states), ISF (Israel), ANR (France), NWO (Netherlands), NSERC (Canada), Royal Society (UK), EPSRC (UK), National Science Foundation (NSF), European Research Council (ERC), Swiss NSF (SNSF), WWTF (Austria).
