CONTENTS

Challenges in geomorphological methods and techniques	
A. Lang and T. Glade	1
Challenges in aeolian geomorphology: Investigating aeolian streamers	
A.C.W. Baas	3
Advances in the continuous monitoring of erosion and deposition dynamics: Developments and applications of the new PEEP-3T system	
D.M. Lawler	17
Monitoring and modelling particle and reach-scale morphological change in gravel-bed rivers: Applications and challenges	
B.T. Rumsby, J. Brasington, J.A. Langham, S.J. McLelland, R. Middleton and G. Rollinson	40
Application of field geophysics in geomorphology: Advances and limitations exemplified by case studies	
L. Schrott and O. Sass	55
Determination of elastic properties of shallow sedimentary deposits applying a spatial autocorrelation method	
A. García-Jerez, F. Luzón, M. Navarro and J.A. Pérez-Ruiz	74
Comparison of GPR, 2D-resistivity and traditional techniques for the subsurface exploration of the Öschingen landslide, Swabian Alb (Germany)	
O. Sass, R. Bell and T. Glade	89
Detecting Alpine landforms from remotely sensed imagery. A pilot study in the Bavarian Alps	
N.J. Schneevoigt, S. van der Linden, H.-P. Thamm and L. Schrott	104
Assessment of land degradation susceptibility by scenario analysis: A case study in Southern Tuscany, Italy	
M. Märker, L. Angeli, L. Bottai, R. Costantini, R. Ferrari, L. Innocenti and G. Siciliano	120
Using dynamic modelling to simulate the distribution of rockglaciers	
R. Frauenfelder, B. Schneider and A. Käab	130
Dating intramontane alluvial deposits from NW Argentina using luminescence techniques: Problems and potential	
J.Q.G. Spencer and R.A.J. Robinson	144
